The Principles of Excellence

Excellence is not cheap and definitely not a gift. It is an attitude of your Spirit being which is reflected unto the mind and translated to the Body in Speech and in Action. Excellence is a Journey; it's a state of continuously improving Quality. Excellence does not occur in a state of inertia, or constant velocity, it's an energy consuming process.

Excellence requires you to push yourself continuously through good and bad times.

You must keep pushing and never retract to Comfort zone. It is never an accident; it's a product of conscious choices and deliberate Actions. PERFECTION is the highest state of Excellence.

VALDYMAS COLLEGE – DIRECTORS

Mrs Dorcas O. Kolawole is passionate about superior service delivery and customer delight. She has 8 years working experience in a leading banking institution in Africa (Guaranty Trust Bank PLC). She has her bachelors in Agriculture with Economics specialization and a Masters in Business Administration.

Joshua Kolawole is a quality improvement specialist, transforming minds evangelist and an educational entrepreneur with more than 16 years experience in educational administration. He is a Public Health Physician with a Masters in Business Administration.

Excellent people always pursue solutions and they conquer challenges while average People complain, grumble and stare at problems. In every field of life, People are looking for EXCELLENCE. Once found, they always pay for it. If you are currently not being paid or paid well, You need to commit to a life of excellence.

You must make up your mind to give more than you take from life, it's an attitude of responsibility not a disposition of rights. Excellence

is simply achieved under PRESSURE. You will Learn, Relearn and Unlearn under strict Discipline. Whoever hates pressure and discipline hates his/her Soul and is not qualified on the journey to EXCELLENCE.

Never fight those who put you under pressure, never resist anyone who drives you through discipline. Embrace correction and Criticism with a humble disposition. Love people who press you HARD, and Push you out of your Comfort. Whoever teaches you otherwise Hates your future. Excellence is therefore ability to increase your Hunger and Appetite (Capacity) for more despite the obvious challenges. You must keep competing with yourself and getting it done BETTER. It's a never ending quest. You will need faith and patience.

FOUR PRINCIPLES OF EXCELLENCE

1. **Develop a deep commitment/Passion for EXCELLENCE. Be hungry and stay hungry** - Always sacrifice to be the BEST. Go the proverbial Second mile always. Do not settle for average. The greatest enemy of your progress is your last Success.

2. **Possess Ethics and Integrity**

Your skill will win sprint(100m or 200m race), You character will win the Marathon race of Life.

Morality is far stronger than talents. Beware of who you are becoming in the pursuit of what you want, never violate principles. Say what you

mean and mean what you say. Demonstrate consistency and faithfulness in all you do.

3. **Excellence shows genuine respect for others. Honour people and protect their personal dignity.** People don't care how much you know until they know how much you care. To honour, to esteem and to place high value on others is an attribute that requires consistency and it is reciprocal.

4. **Never stop learning and developing your mind.** Take full responsibility for your intellectual yearning and pursuit of knowledge. Knowledge is Man's best friend, it brings light, life and freedom into our path. Ignorance and lack of passion towards learning is man's greatest enemy. Whenever you stop learning, you start losing, When you stop growing in knowledge you start dying.
